

# NAMAN MANOCHA

AGENTIC AI ENGINEER — Multi-Agent Systems & Forward-Deployed Engineering

Kolkata, India | 8530356515 | namanmanocha42248@gmail.com | [LinkedIn](#) | [GitHub](#)

## SUMMARY

AI engineer who owns problems end-to-end — from scoping requirements with real users to shipping and operating the deployed system. Solo-built **TalentOS**, a dual-pipeline autonomous agent platform (Google ADK + LangGraph) with human-in-the-loop guardrails, and **FundersAI**, powered by a multi-agent pipeline with a router agent that classifies intent. Independently builds and ships these end-to-end while working as solo tech lead at PayGain — repeatedly the sole engineer turning ambiguous business needs into working software in front of clients.

## TECHNICAL SKILLS

**Agentic AI:** Multi-Agent Orchestration (LangGraph, Google ADK), RAG (LangGraph), LLM Routing/Intent Classification, Prompt Engineering, Shared-State Agent Pipelines, AI Observability (Langfuse)

**Delivery & Infra:** Python, FastAPI, REST APIs, Docker, Kubernetes (K3s), AWS EC2, GitHub Actions (CI/CD), Supabase/PostgreSQL, Google Cloud Run, Vercel

**Product & Frontend:** Next.js, React, TypeScript, requirements scoping, client-facing delivery, ETL Pipelines, Data Validation

## EXPERIENCE

**Technology Manager — PayGain Multiservices Pvt. Ltd.**

*Feb 2025 – Present*

*Kolkata, India*

- Sole engineer scoping and leading a company-wide mobile app spanning client/employee onboarding, document access, product registration, training, and payments.
- Works directly with business stakeholders to translate requirements into deployed systems — lead-capture automation (Make), company website (30+ client conversions), and 20+ live technical presentations simplifying investment/insurance products for 300+ seminar attendees.

## INDEPENDENT PROJECTS

**FundersAI — AI-Powered Research Platform for Indian Stocks & Mutual Funds**

*fundersai.co.in*

*Python, FastAPI, Next.js, LangGraph, Groq, OpenAI | ~143K LOC, 864 files, 430 commits, 167+ test suites — OpenAI Build Week*  
| Live: [www.fundersai.co.in](http://www.fundersai.co.in) | Repo: [github.com/Naman6019/FundersAI](https://github.com/Naman6019/FundersAI)

- Multi-Agent Orchestration:** designed a custom multi-agent pipeline (Planner → Quant → Research → Synthesis agents) with shared state, where a Groq-hosted LLM router agent classifies query intent and directs execution across stock, mutual-fund, comparison, and market-news paths.
- End-to-End Ownership:** solo-designed and operated the full system — 7-node citation-grounded RAG pipeline, data, ML, backend, frontend, CI/CD — plus **FundersAI Reports**, a decoupled LangGraph microservice solo-provisioned on an AWS EC2 K3s cluster.

**TalentOS — Autonomous Opportunity Intelligence Platform (All Things Agentic Hackathon)**

*Python, Google ADK, LangGraph, Next.js, Firestore, Google Cloud Run | ~23K LOC across 131 files, 69 commits, 235+ test suite*  
| Live: [all-things-agentic-allthingsage...](https://all-things-agentic-allthingsage.com) | Repo: [github.com/Naman6019/all-things-agentic](https://github.com/Naman6019/all-things-agentic)

- Dual-Pipeline Agent System:** built an autonomous opportunity intelligence platform (Taskmaster track) using LangGraph StateGraphs orchestrating Google ADK agents on Gemini via Vertex AI across dual Careers & Studio freelance pipelines, ingesting ~2,500 postings/run across 8 ATS feeds. LangGraph StateGraphs orchestrating Google ADK agents on Gemini via Vertex AI ingesting ~2,500 postings/run across 8 ATS/aggregator sources.
- Cost-Disciplined Evaluation:** deterministic pre-filtering cuts 91% of postings before any LLM call, then a 3-state evaluator agent and a drafter agent auto-generate tailored resumes, cover letters, and pitches, with run state in Firestore and Cloud Scheduler cron triggers.
- Guardrails & Ownership:** shipped human-in-the-loop send gates and anti-automation platform-compliance checks — solo-owned the agent design, a 235+ test hermetic suite, Langfuse observability, Cloud Run/Vertex AI deployment, and a Next.js 15/React 19 dashboard.

**CareFlow Intelligence — Agentic RAG & Fine-Tuning System**

*Python, FastAPI, Next.js, Supabase/pgvector, ChromaDB, Unsloth, Ollama | ~7,300 LOC, non-clinical, synthetic-data-only*

- Second Agent System:** a bounded-tool-loop citation-grounded RAG agent over 4 ingestion pipelines (37 documents, 620 chunks) plus a human-in-the-loop Data Intake Agent gating autonomous data ingestion — solo fine-tuned Qwen2.5-7B via RAFT + QLoRA (88.5% precision, 92.3% recall) and shipped it behind a Dockerized FastAPI + Next.js stack.

**GitResume — Autonomous Resume & Portfolio Intelligence Agent**

*Python, Typer, Rich, Ollama, python-docx | ~4K LOC across 26 files, 23 commits | Repo: [github.com/Naman6019/git-resume-agent](https://github.com/Naman6019/git-resume-agent)*

Self-built a multi-agent pipeline (Inspector → SchemaDiscoverer → Synthesizer → GroundingVerifier) that scans git history/AST, synthesizes quantified resume bullets via LLM, and adversarially verifies every metric against commit diffs before compiling to Word/PDF with native hyperlinks — published to PyPI as git-resume-agent; runs on every commit via a git hook.

EDUCATION & ACHIEVEMENTS

---

**B.Tech, Computer Science Engineering (AI & ML Specialization) — VIT Amaravati** *June 2021 – Sept 2025*  
CGPA: 8.2/10 | Published research paper on QA/NLP | Certifications: Azure Administrator Associate, AWS Certified Cloud Practitioner
